# Biodiversity Policy

Actron recognizes that maintaining ecosystems and the natural environment is a fundamental cornerstone of sustainable development. With reference to the United Nations Convention on Biological Diversity and the United Nations Sustainable Development Goals (SDGs), the Company is committed to minimizing the impact of its operations on biodiversity and promoting the sustainable development of the natural environment.

## ■ **Commitment**

Actron is committed to reducing biodiversity impacts across its own operations and value chain. The Company complies with applicable regulations and international initiatives, systematically manages the impacts of its operational activities on biodiversity, and continuously reviews and enhances its internal management mechanisms.

## ■ **Strategies**

### **1. Implement Environmental Management and Reduce Ecological Impacts**

Reduce the impact of operational activities on the natural environment through measures such as energy conservation, carbon reduction, pollution prevention, and resource recycling.

### **2. Promote Biodiversity Risk Assessment**

Identify potential impacts of operational sites and the supply chain on the ecological environment, and implement appropriate management and improvement measures.

### **3. Avoid Impacts on Ecologically Sensitive Areas**

Avoid conducting major development or operational activities in areas with high biodiversity value or within protected areas.

### **4. Collaborate with the Supply Chain to Protect the Environment**

Encourage supply chain partners to comply with biodiversity-related standards and jointly reduce ecological impacts.

### **5. Support Ecological Conservation and Environmental Education**

Support biodiversity conservation and related initiatives, where appropriate, to foster environmental awareness and responsibility.

### **6. Natural Capital and Climate Action**

Explore opportunities related to natural carbon sinks, such as forests, soil, and oceans, to help mitigate climate change.
